

PE Self-adhesive Protective Film is a type of PE film, widely used for ABS, PMMA, PC, PS and other plastic sheets.

Particulars:

Particulars	Test Method	Unit	Values
Width	Measuring Tape	mm	Up to 3000
Thickness		microns	15 - 200
Tensile Strength	GB/T 1040.3-2006	MD (Mpa)	15 to 50
		TD (Mpa)	15 to 50
Elongation at Break	GB/T 1040.3-2006	MD (%)	180 to 1300
		TD (%)	180 to 1300
Density		g/cm ³	0.925-1.000
Treatment value	ASTM D-2578	Dynes/ cm	42
Coefficient of Friction	GB/T 10006-1988		0.10 - 0.60
Winding Direction			Treated Inside
Roll Diameter		Meters	500 - 10000
Core inner diameter		mm	76
Type of Core	Paper Core/ Plastic Core		
Film Color	Transparent,White,Blue,Green and etc.		

- 1.Packaging - Individually wrapped in plastic thin wrapping film
- 2.Rolls are supplied in soft packing.
3. Palletized packing available on request.

Features:

1. Can be customized.
2. Good thickness uniformity.
3. No glue, but sticky.
4. Can be printed LOGO.
5. The maximum width can be 3 meters.
6. Viscosity can be adjusted.

Terms and Conditions:

Storage Condition	The film should be stored safely at ambient temperature, Dry atmosphere and away from direct sunlight
Shelf Life	The total shelf life of this film is 6 months from the date of manufacturing
Terms of Usage	<p>Data provided here is proprietary to Kaide Material , and Kaide Material reserves the right to make any changes to the information in this document or to any products and services at any time without notice.</p> <p>The product information is based on our present knowledge and is intended to provide the information on our current products and how they might be used in a general term. It is the Users' responsibility to independently determine suitability of any products and to test and verify the same for their individual usage.
